

1) When SpiceStor™ is used in a cabinet or on a shelf the rounded handle should be aligned towards the front.

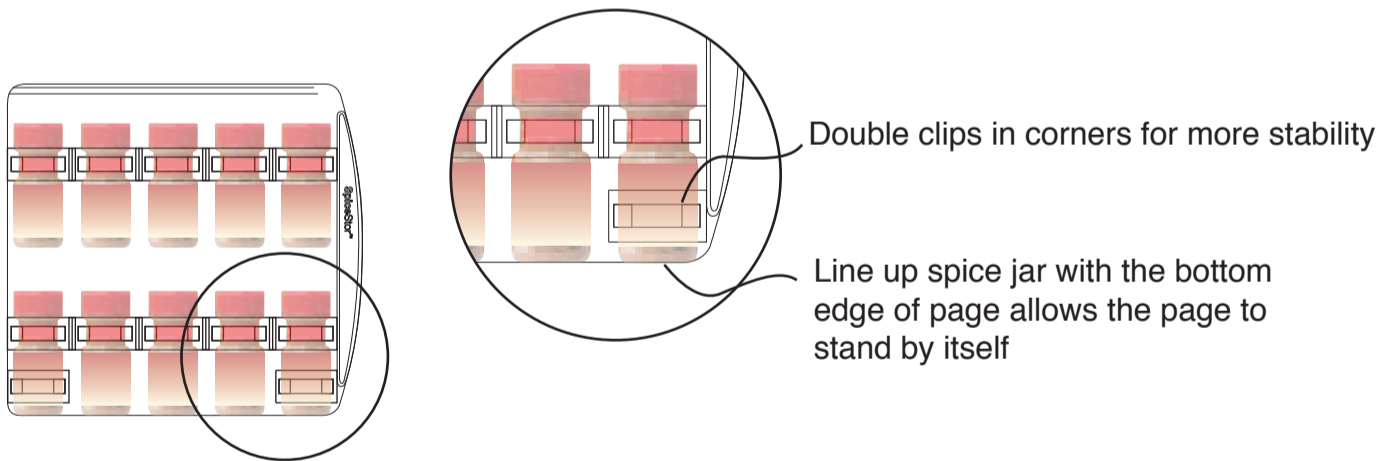

2) When SpiceStor™ is used in a drawer or box the rounded handle should be at the top.

3) If you plan to use the hanger - verify that clip strips and top of the spice container is below and does not interfere with the pages ability to slide in the hanger.

4) If you plan to let the SpiceStor™ page stand independently, we highly recommend that the bottom row of clips/containers on both sides of the page be positioned along the bottom edge of the page AND that the 4 corner positions have a double clip. This will allow the page to stand on a shelf or counter by itself.

5) To secure heavy glass containers use 2 clips per position.

6) Jars/containers should not extend beyond the boundaries of the SpiceStor page.

7) SpiceStor™ clips can be easily snapped apart and cut with scissors to provide even greater flexibility laying out larger containers or irregular layouts.
